Entrepreneurial Thinking : Future Thinking in Museums

How do we turn challenges such as ageing, declining local populations, shrinking resources, etc. into opportunities for our organizations? A major component of this process is trend spotting— how to identify user/consumer trends in other sectors, assess their potential relevance to heritage organizations, and use as inspiration for the development of new practices, products and/or programs.

Presented by Jane Severs, Association of Heritage Industries. ***This workshop is an elective course for MANL's Museum Certificate Program.***
